

M2250 Loud Ringer

An audible Loud Ringer can be activated when the M2250 Console rings. The Algo 4100 AuxBox (Release 2 or newer) can detect a ring signal to the console by monitoring the TN1 wire pair and operate a dry contact.

This dry contact output can be used to activate the 1825PM Duet Plus auxiliary ringer and, if required, the optional 1185 Horn Speaker.

Requirements

- 4100 AuxBox
- 1825PM Duet Plus
- 1185 Horn Speaker
- Pre-wire
