

## Desktop Call Recording Solution for Meridian Digital Centrex Telephones

The Algo 5006 Centrex AuxBox is a professional quality desktop call recording solution for Nortel Meridian Digital Centrex M5000 and M6000 series telephones. Telephone conversations are stored as call records on a customer-provided PC using Algo's Client Call Recorder single-user software provided with each unit. Alternatively, Algo's Enterprise Call Recorder (ECR) software is available for multi-user applications.

Algo's recording software allows call records to be easily played back through a PC. Call Records may be emailed for quick and easy sharing of telephone conversations to facilitate quality monitoring, training, or distribution of key information. Call records can be easily searched, sorted, retrieved or moved for quick and efficient archive management.

Voice recording may be activated automatically or manually 'on-demand' by pressing a key on the PC keyboard or telephone itself. Manual recording permits conversations to be recorded at any time during the call, with the most recent unrecorded calls cached for handy 'post-save' retrieval. USB connectivity to the PC ensures high quality digital speech and data recording over a single plug and play connection supported by Windows® in WMA or WAV file formats.

### Features

- Automatic or 'on-demand' call recording
- WAV or compressed WMA audio format
- Call display information recorded
- Call duration, date, and time
- Call record, move, email, and copy functions
- Task bar flashing indicator when recording
- Call record storage management
- Relay outputs for ring, message waiting, and in-use (off-hook)

### Typical Applications

- Hospitals, universities
- Call centers, customer service
- Financial trading, banking, accounting, legal
- Contract negotiation, purchasing, sales
- Training, quality monitoring, human resources
- Security and liability risk assessment
- Conference call meetings

## Ordering Information

Description	Product Code
Centrex AuxBox Call Recorder (includes Client Call Recorder Software CD, USB cable, telephone cord, and Installation Guide)	5006

## Specifications

Power supply	Adapter included; 24 V / 200 mA, Class II
Bridge tap	10 ft (3 m) Recommended maximum (if not series)
Digital loop connection	RJ12 jacks series or bridging
Dry contact outputs	Two provided; 2.5 mm jacks; option selectable for any combination of ringing, in use, or message waiting; 30 V SELV, 1 A non-inductive load
Analog audio output	One provided; 3.5 mm audio jack 0 dBm or -12 dBm output 600 ohm
PC Requirements	Windows 2000, ME, XP, Vista, USB port
USB	1.1
Cables provided	One 6 ft (1.8 m) USB cable One 6 ft (1.8 m) 2.5 mm-to-2.5 mm relay cord One 7 ft (2.1 m) 6-conductor telephone line cord
Dimensions	Width - 5.75" (14.5 cm) Depth - 6.75" (17.5 cm) Height - 1.5" (4.25 cm)
Compatibility	Meridian Digital Centrex telephones: M5208, M5212, M5312, M5209, M5216, M5316, M6310, M6320 (two 622 add-on modules are supported with the M6320)
Included Software	Algo Client Call Recorder (CCR) Software
