

ALGO IP ENDPOINTS CERTIFIED FOR MICROSOFT TEAMS

Deploying IP devices for your voice paging, alerting, and door entry requirements is easier than ever with native interoperability via the Microsoft Team's SIP Gateway.

Algo IP Endpoints are certified for native compatibility with Microsoft Teams via the Microsoft Teams SIP Gateway. With this integration, organizations gain the ability to deliver voice paging, emergency alerting and loud ringing through an Algo device natively integrated to the Team's platform via the SIP Gateway. Algo offers innovation solutions to overcome several common challenges faced when organizations migrate to Microsoft Teams.

Enable Legacy Voice Paging Systems

Algo IP Paging Adapters easily integrate analog paging systems into Microsoft Teams.

Deploy IP-Based Voice Paging

Algo IP Speakers provide a complete IP-based voice paging solution in Microsoft Teams.

Deliver Emergency Alerting & Notifications

Algo IP Alerting devices enable emergency alerting and loud ringing in Microsoft Teams.

MICROSOFT TEAMS-CERTIFIED IP ENDPOINTS
